To whom it may concern:

I recently hired Bayline Demolition Incorporated to complete a residential demolition project in San Jose. The Project involved a wide range of demolition techniques including heavy equipment, small tractor equipment and hand-tools. Bayline completed the project in a clean and professional manner and met my schedule despite foul weather conditions. I would recommend hiring them for similar projects and will certainly use them again for my own projects in the future.

Sincerely
Troy Smothermon/ Project manager
